

...Global  
knowledge.

Local  
wisdom...

This year Withers Tsang will have been in business for 25 years. A ripe young age and milestone in our continuous commitment to helping clients to flourish, both in their lives and businesses.

Now, in 2023, we're offering you a wider range of service by joining the PKF global accountancy community.

As PKF Withers Tsang we can provide all our clients with access to international multi-disciplinary expertise as well as connection to a worldwide network of experienced firms – each renowned in their markets for delivering the very best in client service.

Our vision has always been to help our clients grow wealthier and happier. They are, and always will be, our inspiration. And after 25 years, we're proud, just quietly, of our contribution to their success, as well as for the reputation we've built right here in Auckland – the multi-cultural business capital of New Zealand. Our international affiliation with PKF is therefore a confident step forward for the firm.

#### Who is PKF?

PKF is a global community of independent accountancy businesses spanning the Americas, Africa, Europe, the Middle East, India and Asia Pacific. In New Zealand, we're set to play a pivotal role in the PKF network with our multi-disciplinary talents and industry sector strengths combining with those of other PKF affiliate practices stretching from Northland to the deep South.

#### Why the move?

Joining PKF is not just about size. Far from it, bigger is not always better. Instead this move is about connecting our business and those of our clients to a collective vision – where networked firms work together to help clients unlock global possibilities and achieve success wherever they are, now and in the future.

Going forward, PKF Withers Tsang clients can connect into a network comprising specialist cross-border technical knowledge and international business counsel.

#### How will this impact you?

Rest assured, all our clients – with businesses large or small – can continue to expect the same degree of detailed personal attention and sensitivity to their individual needs as always. We'll never compromise on that. Indeed every office in the PKF community shares the same values and a belief that exceptional service based on understanding a client's individual needs is paramount.

We're extremely excited about 2023, despite the economic outlook. All the more reason to connect us and our clients into a strong international community of accountancy practices. It's a compelling competitive advantage, and at precisely the right time. Not bad progress for a 25 year old.
